(54) Title: MULTISCREEN DISPLAY SYSTEM

(57) Abstract: A system including two or more devices that are enabled for screen sharing. A screen connect function is resident on at least one of the devices. Activation of the screen connect function initiates the screen sharing between the devices. The screen sharing may include a sharing of a display capability of one device with the other device. Additionally or in place of the sharing of the display capability, other functionality such as processing capabilities, touch screen control, etc. may be shared between devices. The screen sharing may include a transfer of a user interface or portion thereof from a first device to a second device. This user interface or portion thereof operated on the second device functions as a user interface of the first device. The screen sharing may be enabled when the devices are brought into proximity with each other. A screen connect function may initiate the screen sharing.
